0xBet: Documentation

Revolutionizing Sports Gambling with AI

Introduction

Welcome to 0xBet, a pioneering company at the forefront of integrating artificial intelligence with sports gambling.

We are excited to introduce our flagship product: a Telegram bot designed to revolutionize the way you engage with sports betting. Our bot offers a unique blend of predictive analytics, arbitrage opportunities, and a revenue-sharing system, all geared towards enhancing your betting experience across a multitude of sports.

Product Overview

AI Powered Predictions

Our Telegram bot stands out by providing precise match predictions across various sports, including soccer, cricket, baseball, racing, and more. Here's what the bot offers:

Match Analysis: Before every game our bot conducts a thorough analysis. In the example of soccer this includes evaluating team performance, player availability, and recent form to generate reliable predictions.

Daily Picks: Each day, the bot will provide analysis for three upcoming matches, complete with betting multipliers, allowing you to choose your best bet.

Arbitrage Betting

For those interested in risk-free profits, our bot facilitates arbitrage betting by identifying bookmakers offering odds that guarantee a profit regardless of the match outcome.

Imagine a scenario where you could place bets on all possible results of the Real Madrid vs. Barcelona match across different bookmakers. This secures a guaranteed profit with a well-calculated distribution of your budget.

Revenue and Partnerships ⍺

Revenue Share System

We reinvest profits generated by our marketing wallet into the bot's predictions, creating a revenue-sharing ecosystem. Profits won through the bot's betting recommendations are distributed, with 40% of the total profit shared among our users.

Partnerships and Membership

Our network of partnerships with esteemed tipsters worldwide will play a crucial role in marketing and promoting our bot. Initially, access to our bot will be complimentary for the first 24 hours. Following this period, we will offer a paid membership for continued access to our premium service.

Bot Interaction Examples α

Prediction Requests

User Command: '/prediction'
Bot Response: Provides detailed match predictions, including event, teams, AI prediction, and betting advice.

Example:
Event: Serie B (Italy)
Teams: Cittadella – Pisa

=>COST: 9700.0
=>PROFIT: 240.0$ max – 200.0$ min

Roadmap

Phase 1: **Foundation and Planning**

Hire top AI talent for research

Build the core team

Develop a strong AI analyzer

Phase 2: **Development**

Initiate development

Design the Telegram user interface

Build the brand

Teach the bot how to use various algorithms

[Integrate those algorithms in its code]

Phase 3: **Launch and Expansion**

Line up influencers for marketing

Launch #0xBET (Stealth launch)

Publish the prediction's channel free trial

(72/144 hours)

Update Dextools

Update Dexscreener

Coingecko Listing

Develop 'Fetch matches details' feature

Coinmarketcap Listing

Start the partnership program

Threads competition

Betting challenge competition

Distribute the first revenue share

Implement broadcast message ads

Launch #0xBET betting/staking dapp

Create a Whale group

Twitter spaces

Hire TOP AI talents

[To improve algorithms and elaborate info]

Implement new functionalities in DAPP (TBA)

Onboard 2 Tipsters to bet using the bot's
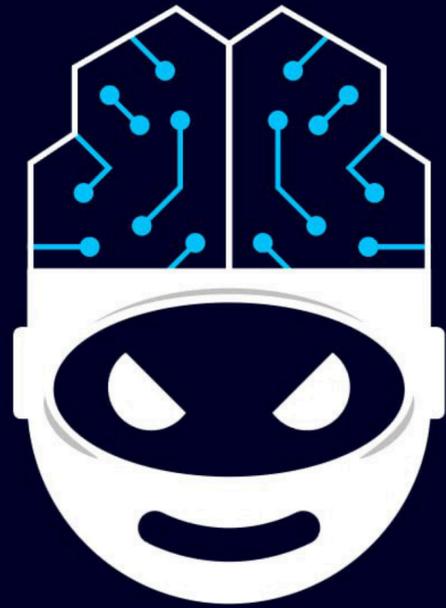

predictions

Looking Ahead

Future Directions

Initially, our bot will operate exclusively within a private channel, offering users match information driven by our AI algorithms.

In the future, we will broaden access to our bot, transitioning to a subscription-based model for ongoing use of our premium services. This approach ensures a tailored and high-quality betting advisory service.

Conclusion

At 0xBet, we're committed to enhancing your sports gambling experience through the power of AI. Our Telegram bot is just the beginning. Stay tuned for more innovative features and updates as we continue to evolve and expand our services.
